Bug : Edit and Delete buttons issue in Manage User Profiles

Description:

1. Click My Account / Manage User Profiles
2. **Minimize the page and resize until + sign is displayed**
3. Click Edit button
   1. Issue: Edit record is blank
4. Click Cancel
5. Click Delete button. Delete record pop up page displayed.
6. Click Delete button.
   1. Issue: Internal Server error is displayed. User is not deleted.
   2. Updates 12/04: Delete button is not working. Nothing happens when Delete button is clicked.

Analysis: When we click on MyAccount button then when we have to click on Manage User Profiles then datatable will load as shown below:

Manage User Profiles

Search:

USER	USER ID	DISCIPLINE	REGION	ROLE	STATE	COMPANY	ACTION	
Alfred Arce	arcealx	All Disciplines	All Regions	General Internal User	ALL		EDIT	DELETE
Bodanapu Hindu Reddy	breddy1	All Disciplines	All Regions	General Internal User	ALL		EDIT	DELETE
Brittany Dodgen	bdodgen	All Disciplines	All Regions	Super Administrator	ALL		EDIT	DELETE
Bruce Cox	coxbr	All Disciplines	All Regions	GIM Administrator	ALL		EDIT	DELETE
Bryan Beck	bjb5307	All Disciplines	All Regions	General Internal User	ALL		EDIT	DELETE
Chaitanya Kunaparaju	cvkuna1	All Disciplines	All Regions	Super Administrator	ALL		EDIT	DELETE
Christopher Wood	CWood7	All Disciplines	All Regions	General Internal User	ALL		EDIT	DELETE
Donald Andrews	%PublishDE_WO_CUE	All Disciplines	All Regions	General Internal User	ALL		EDIT	DELETE

Example 1:
Screenshot as shown on full screen when we click on Edit & Delete button it is working perfectly and showing the record inside it.

Conslusion: On Click of Edit & Delete button it is calling the same function when page didn't resized and when page gets resized then also it is calling the same function but when page gets resized edit record is not showing and delete record as well it Is not showing as shown below:
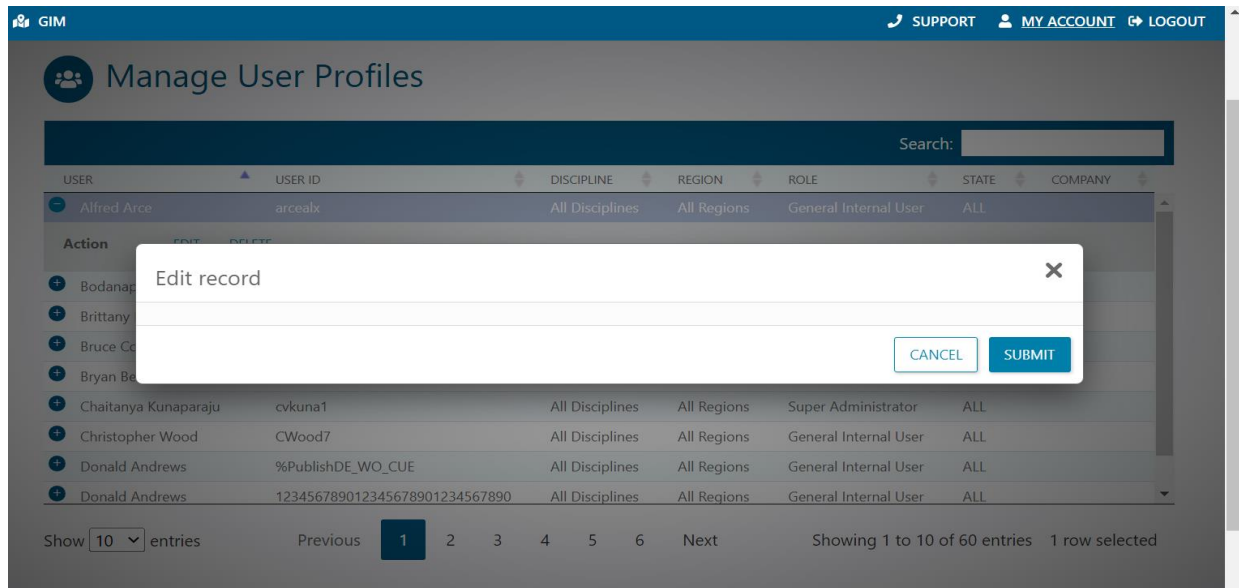

Calling the same function inside the code even after page get's resized as shown :

```javascript
$('#editRoles').on('click', 'a.editor_remove', function (e) {
    e.preventDefault();
    // var row =$(this).closest('tr');
    var deleteRow=   table.row( $(this).parents('tr') ).data();
    console.log (deleteRow);
    var alertMessage = 'This will delete the user <strong>'+ deleteRow.fullName +' </strong>and associated information. Do you still want to delete?
    var alertTitle = 'Delete record';
    $.ajax({
        async: false,
        type: "POST",
        url: "isUserAssociated",
        data: { 'lanId': (deleteRow.lanId)},
        success: function (response) {
            if(response == 'ACTIVE') {
                alertMessage = 'This will deactivate the user <strong>'+ deleteRow.fullName +' </strong>and associated information. Do you still w
                alertTitle = 'Deactivate record';
            }
        }
    });

    editor.remove( $(this).closest('tr'), {
        title: alertTitle,

        message: alertMessage,
        buttons: [
            { text: 'Confirm', className: 'btn btn-primary', action: function () { this.submit(); this.close() } },
            { text: 'Cancel', className: 'btn btn-secondary', action: function () { this.close(); } }
```

```javascript
$('#editRoles').on('click', 'a.editor_edit', function (e) {
    e.preventDefault();

    editor.edit( $(this).closest('tr'), {
        title: 'Edit record',
        buttons: [
            // 'Submit',
            { text: 'Submit', className: 'btn btn-primary',action: function () { this.submit(); this.close(); } },
            { text: 'Cancel', className: 'btn btn-secondary',action: function () { this.close(); } }]
    } );

    $(".DTE_Body_Content input, .DTE_Body_Content select").addClass('form-control');

} );
```

Solution: I got the solution like even after page gets resizd then the Action column should not come under the + icon it should remain on the screen itself so I did the code change. I make the column as more responsePriority : 1 so that in this case an element with a "responsivePriority" of 1 might have higher priority than those with lower values as shown below:

```
    ],

    columnDefs: [
    {"responsivePriority": 1, "targets": 9},
        {
            "targets": [ 7,8 ],
            "visible": false,
            "searchable": false
        },
        { "targets": [0,1,2,3,4,5,6]},
        { "width":"150px", "targets": 0 },
        { "width":"80px", "targets": 1 },
        { "width":"80px", "targets": 2 },
        { "width":"150px", "targets": 3 },
        { "width":"50px", "targets": 4 },
        { "width":"180px", "targets": 5 },
        { "width":"120px", "targets": 6 },
        { "width":"70px", "targets": 7 },
        { "width":"100px", "targets": 8 },
```

Result:
